Samsung Galaxy S24 - The Future Flagship is On The Way!

Samsung is working on the Galaxy S24 series. It has been reported that there are some leaks and news circulating on the internet regarding the release of this flagship series. These recent leaks indicate that Samsung's Galaxy S24 will come with a bezel-less display displaying 6.2 inches of dynamic AMOLED 2X capacitive touchscreen display that supports an HD Plus resolution of 1080 x 2340 pixels and a high refresh rate. The display of the Samsung Galaxy's S24 has the protection of tough Corning Gorilla Glass, which can exist in harsher conditions. Now let's move on to the photography section of this Samsung Galaxy S24. In addition to the large 50 MP primary camera sensor, users will also find two additional sensor senses of 10 MP and 12 MP on board this smartphone. On the front, it will have a single 12 MP selfie camera with some additional features such as dual video calling, auto-HDR, HDR10+, video (4K@30/60fps, 1080p@30fps), etc.

The brand new Samsung Galaxy S24's 8GB of RAM and 256GB of built-in storage. As for the dedicated memory card slot, there hasn't been a confirmation yet as to whether it will support it or not. It is worth noting that the Samsung S24 runs on the most powerful Exynos 2400 chip and a 3.2 GHz Deca-Core CPU in order to deliver unbeatable processing performance in comparison to its predecessors. The future Galaxy S24's a big 4000 mAh battery pack that is going to last the whole day on just one charge. Additionally, it will support fast charging, wireless charging, and reverse charging to fill up this beast in minutes. Now all the other brands are preparing themselves to compete with the Galaxy S24 by Samsung.
